

FEATURES

- Designed for Commercial, Industrial and Architectural use.
- Accepts glass glazing up to 1-5/16" thick, including monolithic or insulated glass units.
- Aluminum finish can be anodized, baked enamel or high-performance PVDF fluoropolymer paint.
- Available with conventional aluminum cover caps or as a silicone butt glazed system.
- Condensation and leakage are controlled by separate gutters.
- Thermally improved framing is available.

TEST RESULTS

Air Infiltration per ASTM E-283:
0.010 cfm/sq. ft. @ 12 psf

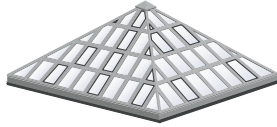

Water Infiltration per ASTM D-331:
No Leakage @ 15 psf

Structural Test per ASTM E-330:
Deflection of Less Than L/250 at 60 psf

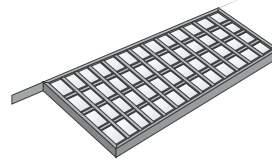

CONFIGURATIONS

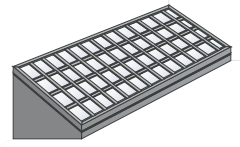

RIDGE
(WITH HIPPED ENDS)

PYRAMID

RIDGE
(WITH OR WITHOUT END WALLS)

SINGLE SLOPE
(SHED TYPE)
