

EXTECH's CLEANWALL is a durable, vandal-resistant porcelain wall system, ideal for high-traffic areas such as transit and other public applications that are prone to damage. CLEANWALL expertly resists graffiti, vandalism, scratching, chipping, gouging, and other environmental damage with its smooth finishes, rounded corners, enclosed edges, and concealed fasteners.

The CLEANWALL's porcelain panels and robust aluminum framing create a durable, flexible, and virtually maintenance-free system allowing for quick and easy installation, individual panel replacement, and easy cleaning.

SYSTEM FEATURES AND BENEFITS

- Eight (8) micron thick porcelain 26ga steel face sheet laminated over ½" cement board with steel backer sheet provides superior impact resistance
- Components can be provided in stick form or prefabricated
- Rounded inside and outside corners for improved safety, durability, and cleaning
- Individual panels are removable for:
 - Panel replacement without disturbing adjacent panels
 - Inspection access behind panels (e.g. structural waterproofing, electrical, etc.)
 - Post installation of wiring and through-wall recessed devices
- Can be installed over a wide variety of substrates
- Deeper pocket depths and no need for mitered corners, reduce installation costs
- Unbroken panel lengths up to 12'
- Framing can accommodate 1/2," 3/8," or 1/4" panels in a variety of widths
- Adaptable to wall openings and varying field conditions
- Allows for repeated installation and removal of adhered advertising films
